DETAILED ACTION

Reasons for Allowance

1. Claims 1- 29 are allowed.

2. Examiner's Statement of Reasons for Allowance:

Applicant(s) invention relates to a method and system for controlling a turbine/alternator, and more specifically, to a startup process turbine/alternator.

The system has a gas turbine, a permanent magnet alternator, an inverter, and an electrical system for controlling the start-up of the turbine/alternator to achieve a self-sustained operation and later reconfiguring the inverter for controlling frequency and voltage output as a function of time.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the combination of the turbine/alternator features and its operation, as disclosed and claimed, and which examiner's search failed to find.

It appears that present invention is an improvement over applicant(s)' earlier inventions of the record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant(s) disclosure.
